ACKNOWLEDGEMENT

First of all, I bow my head before Almighty for his boundless blessings, which accompanied me in all endeavors.

Gratitude cannot be seen or expressed, it can only be felt deep in heart and is beyond description. Although ‘thanks’ are poor expression of debt of gratitude one feels, yet there is no better way to express it.

The very idea of this work completed makes me mused over to thank all those who were instrumental in completion of this important milestone of my academic journey. Although, thanks express the modicum of truth and the deep sense of gratitude, one feels from the core of heart, yet there is no better way to express it. I allude this present opportunity to express my deep sense of gratitude and obligation to my esteemed Major Advisor, Dr. Vishakha Singh, Asst. Professor, Department of Food Science and Nutrition for her able and sustaining guidance, continuous encouragement, constructive and valuable suggestions throughout the course of this investigation.

I wish to convey my heartiest appreciation for patience, understanding and round the clock help extended to me by members of my advisory committee, Dr. Shashi Jain, Dean, College of Home Science, Dr. Dhriti Solanki, Professor, Department of Home Science Extension and Communication Management, Dr. N. K. Jain, Professor and Head, Deptt. of Dairy & Food Technology, CDFST, Dr. Vandana Kaushik, Professor, Department of Family Resource Management for their critical suggestions and valuable guidance throughout the pursuit of this study.

Earnest thanks are due to Dr. Renu Mogra, Head, Deptt. of Food Science and Nutrition, for her technical expertise and ever willing help during the progress of this work. I am greatly obliged to other teaching and non-teaching staff of Department of Food Science and Nutrition especially Tejkanta mam, Saroj mam and Aarti mam for their kind cooperation and generous help during the various stages of research work. A special word of thanks goes to the lab assistants Mangilal ji & Man Singh ji, who inspite of their packed schedule, managed to give all the help required in the laboratory.

I would also like to thank Dr. B.R. Ranwah, Professor, Deptt. of Plant Breeding and Genetics, Rajasthan College of Agriculture, for providing me the required material for the study and for assisting me in the statistical work desired in the study.
Words at my command fail at this juncture in form and in spirit to express my heartfelt reverence, unbound gratitude indebness and utmost affection towards my beloved mother Smt. Rajani Sati and father Shri Mahesh Chandra Sati. I shall be failing in my duty if I do not thank my Parents-in-law, Sri K. N. Nainwal and Smt. Hema Nainwal, for the trust they had in me. Perhaps words in any dictionary can express the thankfulness a child feels towards his/her parents. It is their rearing, blessings and prayers that enabled me to climb various staircases of life and conduct and compile this work.

In high spirits, I put on records the name of my husband Dr. Rakesh Chandra Nainwal, for his endless love and support and boosting my moral at every stage of difficulty.

With unbound affection I spread special fragrance of thanks to my adorable brother Umesh and Vishal and brother-in-law Rajeev for their time to time encouragement, care and boundless affection. The little amusement in my life, Yogesh demands a special mention.

Friendship needs no studied phrases, polished face or winking wiles. They are my friends Anamika and Anjali, Manisha, Swati, Kalindri and Krushnapriya who at times criticized, scolded and encouraged me to keep my determinacy to reach at proper decision.

I express my thanks to UGC for awarding me Junior Research Fellowship and helping me financially for carrying out the study.

I have no words to express, about the experience and opportunities MPUAT has provided me in these years. I was blessed with a lot of friends and the moments I spent here are the most memorable moments in my life.

Heartiest thanks are due to Shree Computers for the neat, efficient and meticulous typing of this manuscript.

Above all, I admire the Almighty, as the whole work is possible because of an unknown face that provided me great energy and enthusiasm for work.

Last but not the least, I am thankful to all those who helped me directly or indirectly during my course of study.
