Plate 01: Experimental Broiler birds maintained during experiment
Plate 02: ELISA for HSP70 and Corticosterone in Plasma
Plate 03: Sodium dodecyl sulphate polyacrylamide gel electrophoresis (SDS-PAGE) apparatus
Plate 04: Western blotting apparatus used for HSP 70 expression analysis
Plate 05: Detection of HSP70 in the liver samples of experimental broiler birds supplemented with varying concentrations of ascorbic acid and vitamin E by Western blotting. G1 to G7 broiler tissue sample.
