ACKNOWLEDGEMENT

Towards the end of my endeavour, it’s the right moment to extend my profound gratitude to all those who have directly or indirectly helped me to accomplish my research work which is not a single person’s job; it needs assistance from all quarters of scientific community to keep oneself updated. It is difficult to mention all who helped to me and therefore, I start with expressing my indebtedness for everyone, who generously helped without any faltering.

Sometimes words are not enough to express one’s emotions and expressions. At this point of time, I am unable to express my gratitude and reverberated reverence to my Major Guide Dr. L. K. Sharma, Assistant Professor, Department of Genetics and Plant Breeding, College of Agriculture, Amreli who has baptized me in the field of research. I am immensely self-satisfied to mention that he accorded all his intellectuality and expertise in his field which enabled me to design a painstaking plan and move forward to materialize my research work.

This memorable occasion provides me an unique privilege to offer sincere thanks to members of my advisory committee Dr. G. U. Kulkarni, Assistant Professor, Department of Genetics and Plant Breeding, College of Agriculture, Junagadh Agricultural University, Junagadh, Dr. N. B. Patel, Assistant Professor, Department of Genetics and Plant Breeding, JAU, Junagadh, Dr. M. A. Vaddoria, Research Scientist (G&O), Vegetable Research Station, JAU, Junagadh and Dr. R. S. Tomar, Assistant Professor, Department of Biotechnology, College of Agriculture, JAU, Junagadh for their constant attention, valuable suggestions and help throughout the period of research work.

I acknowledge with thanks for the facilities provided for research work by Dr. A. R. Pathak, Hon. Vice Chancellor, JAU, Junagadh, Dr. V. P. Chovatia, Director of Research and Dean, P. G. Studies, JAU, Junagadh, Dr. B. K. Sagarka, Principal, College of Agriculture, JAU, Junagadh and Dr. C. K. Mandavia, Professor and Head, Department of Genetics and Plant Breeding, JAU, Junagadh.

I offer my sincere thanks to Mr. R. L. Davariya, Mr. Bhimani and all other staff members of Instructional Farm, College of Agriculture, Junagadh Agricultural University, Junagadh for their immense help and best co-operation during the study and experimentation.
I would like to express special thanks to Dr. D. R. Mehta, Prof. Lata J. Raval, Dr. Rajiv Kumar, Dr. S. B. Chaudhari, Dr. M. H. Sapovadiya, Mr. Jeevabhai and other staff members of Department of Genetics and Plant Breeding for their continues and ultimate support, guidance and help during the entire course of research work. All the staff members of academic branch and central library for their ever willing cooperation and encouragement are also highly acknowledged.

I am overwhelmed to express my deepest sense of reverence to my worship that thought may value of life, humanity and truth and I realized the painstaking efforts taken up by them my beloved parents Shri. Devayatbhai Hadiya and Smt. Jivtiben Hadiya. I solemnize to dedicate the thesis to them. I find no words to express my heartfelt gratitude to my brother Satish, sister Ramila for their moral support and encouragement throughout the period of my study.

Finally, I frankly admit that it is not possible to remember all the faces that stood behind the façade at this juncture and omission of any names does not mean lack of gratitudeness. Now as I carry this thesis in my hand, I carry with me memories that will enrich my nostalgia. I have taken literary license but any factorial errors are my responsibility alone.

Last but not least I am very sincerely thankful to my beloved God “Momai Mataji”, “Shree Lord Krishna” and “Shree Lord Shiva” whose grace is always with me to motivate and inspire me for every moment of my work.
