Characters studied in genotypic path analysis

1. Days to 50% flowering
2. Days to maturity
3. Grain filling period (days)
4. Plant height (cm)
5. Number of productive tillers per plant
6. Ear Length (cm)
7. Number of grains per main spike
8. Grain weight per main spike (g)
9. Grain yield per plant (g)
10. Biological yield per plant (g)
11. Harvest index (%) 
12. 100-grain weight (g)
